Experience

OPTEL Group (Verify Brand) – Plymouth, MN   *Mar 2018 – Present*

Software Engineer

Optel Group focuses on delivering serialization and traceability SaaS products to all sectors (L1-L5) of the supply chain. Applications that I work on have a focus on being domain-driven, usable, testable, adaptable, configurable, and lightweight. I am taking lead on initiatives and seeing projects from start to finish including planning/prioritizing, backlog management, development, security, deployment, and management of resources in a cloud infrastructure. My role involves remotely working with teams, working with teams live in person, and occasionally interfacing with customers. Additionally I am learning new technologies and presenting knowledge gained with the software department. My biggest achievement is leading and delivering Certa (www.optelgroup.com/healthcare-certa-software) in 5 months to be used by many pharmacies.

C.H. Robinson Worldwide Inc. – Eden Prairie, MN   *Jan 2016 – Mar 2018*

Software Engineer II

Developed testable, robust, and adaptable software for one of the top industries leaders in Third Party Logistics. The products I delivered were network internal tools used by the sales team and other I.T. personnel. Some of my achievements at C.H. Robinson included taking the lead on various projects, becoming proficient and mentoring in ElasticSearch, and giving multiple presentations – including a lunch & learn.

Education

Winona State University   *Sep 2012 – Dec 2015*

Bachelor of Science, Computer Science
Bachelor of Arts, Mathematics (double major)
